Professional competences:

Management:

- Large experience with management on all levels, direct as well as indirect and Project management. Member of Management teams in 15 years.
- Emphatic manager with focus on the individual employee's competences.
- Organizational development and turn around. Competence and economical evaluation and planning.
- Project management of smaller and lager project involving internal and external partners.
- Experience working under high quality demands, military production/AQUAP, Medico/GMP and clean room production.
- Hiring and dismissal of employees and Key employees.
- Negotiation of salary, Local contracts, Employee development and education.
- Strategic planning and economy control in accordance with overall targets on short as well as long sight.
- Setting up "key-Ratios", quality structure for goals of compliance and follow up.

Logistics, planning and project management:

- Project management, Lean as basic principle lasting result counts.
- Setting and follow-up of KPI/measurable parameter performance management.
- From single to multiple project management and overall coordination of economy and resources.
- Business optimizing of the whole logistic setup, purchasing, stock, production and distribution. Further mapping and optimizing procedures and workflow.
- Directly implied optimizing/planning of resources, purchasing SCM setup, conclusion of contracts.
- Supplier search and select, negotiation and SCM setup inland as well as abroad.
- Outsourcing / Insourcing of business and business units.
- Data analyses, process analyses towards optimization.
- Experience with different it systems in varying production / stock environments.

- Economy:

- Budget planning and follow up; production, sales and stock planning and economical outcome
- Cost-benefit and investment analyses.
- Setting up Master-plan with economic consequences.
- KPI setup and follow up in accordance with the overall business goal.

- Technic:

- Large insight in various production processes and equipment.
- Optimizing on technical /process level. Processes and flow through processreengineering and Lean: Value stream mapping, Kaizen, SMED, o-error design etc.
- Component optimizing, focus on cost optimizing by changing and improving of design.
- Technical support on various types of equipment.

Sparetime:

- Physical active, for the time sailing (with sail). House and garden, dog, but especially the family is high on the agenda. Travel a lot, when possible. Do follow the latest trends via net / books, on management, logistic and Lean.
- Member of "Senior-profession", actively seeking out jobs in Danish companies, especially for 50 years +, supported by the Danish government.

C.V. - Kim Eltong
